

Since its introduction in 1998, the Wheeled Coach Crusader PLUS™ has been the undisputed industry leading workhorse, performing with distinction in both small and large fleets; in rural, urban and metropolitan areas. Wheeled Coach continues that legacy with the Transit Crusader PLUS™.

As EMS demands continue to grow and expand, the flexibility that comes with the choice of headroom as well as various patient compartment configurations allows you to answer those demands. All the while with a lightweight design that is easily maneuvered in heavy traffic, offering increased fuel economy, not to mention improved front-end visibility and electronic roll-stability control.

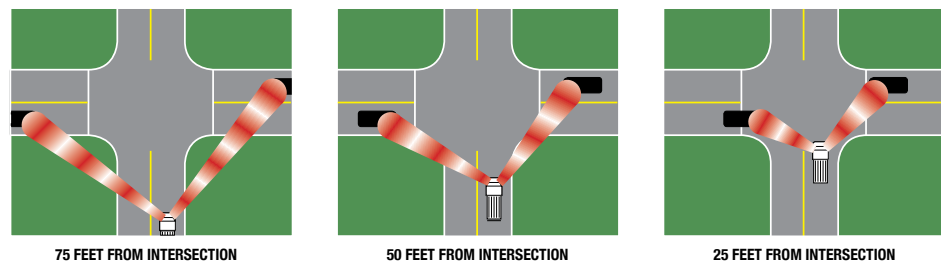

All of this and more, with the fastest delivery time in the industry.

Our Exclusive EnterSafe™ Lighting increases intersection safety

Available on High Roof Only

Because the lights are at a 45° angle, vehicles approaching an intersection on a “collision course” with an ambulance will always have the warning lights angled directly toward them, maximizing their effectiveness.
